

SAFETY GRAM 4.0

June 2022

Air Force Aero Clubs,

Recently there has been multiple instances of poor flight discipline that have resulted in damage to Aero Club aircraft. As we begin the summer period with better weather and increased opportunities for flying it would be judicious for everyone to review some of the principles of flight discipline below, which was published in last June's Safety Gram.

Good flight Discipline is following checklists, rejecting opportunities to take shortcuts, planning and preparing for problems before they arise, and operating in accordance with established procedures and regulations. Aviation statistics have shown that a majority of mishaps have some type of human error as casual factor. From student pilots to the most experienced instructors we need to learn to recognize when we are not practicing good flight discipline and immediately spot correct ourselves from negative and hazardous attitudes like impulsiveness, invulnerability, resignation, and complacency. We also need to be comfortable in recognizing and calling out pilots when they exhibit poor flight discipline. Even the most experienced pilots can have lapses where they may make poor decisions and it is important that that behavior pointed out and corrected.

Flight Discipline is the foundation of airmanship and must be practiced at all times to include preparation, in flight, and in debriefing. Managing hazardous attitudes is a central part of flight discipline and without it can lead to increased stress, higher workloads, and significant human errors. As professional aviators we must continue to strive to exhibit good flight discipline and overall character because the consequences if we don't are dire.

It is an enormous privilege to be able to grasp the stick or yoke and take flight and with that comes a greater responsibility to act accordingly. We must respect and protect the resources we have available to fly in within the Air Force Aero Club Enterprise and most importantly we need to understand if we don't and exhibit poor flight discipline the consequences may be more than repairing or replacing an aircraft it could cost someone their life. Every Aero Club will review flight discipline and decision making at their next scheduled Safety meeting.

Fly Safely,
